# SONICU™

The Leader In Monitoring

MONITORING KITS FOR CLEAN ROOMS OR COMPOUNDING PHARMACIES

- Cost-effective 24/7 monitoring solution

- Differential room air pressure

- Ambient temperature

- Relative humidity levels

- Typical applications include clean rooms in scientific and medical research facilities and hospital pharmacies or pharmaceutical manufacturers that require USP <800> compliance for drug compounding, storage, and distribution.

- Also applied to monitor advanced manufacturing or industrial clean rooms

- All Sonicu kits install easily, can mount virtually anywhere, and are preconfigured for your network.
- Each kit monitors differential air pressure, temperature, and humidity for one room.
- 24/7 access to all monitored locations and data is through the SoniCloud dashboard.
