SONICLOUD SETUP

Your Turnkey, Worry-Free Solution to Deploying a Remote, Wireless Monitoring System

When automating compliance and asset protection are business essentials, clients turn to Sonicu for white glove SoniCloud set up that ensures your monitoring platform is running efficiently and effectively.

Let our team leverage our vast experience and domain expertise to configure your SoniCloud monitoring system so you're confident it's performing to support your team.

Program Highlights Include:

- Sonicu creates and adds all areas and zones for monitoring points utilizing past knowledge of best-use configurations
- Sonicu will create and set up your users for alarm notifications and re-notifications based on criteria provided during the kickoff calls
- Sonicu leverages best practices for regulatory compliance and creates automatic reporting by email each month
- Sonicu will automatically complete monthly site health checks for the first year after setup is complete and review those results with the admin of the SoniCloud site on issues that need resolution
